Eomax manufactures Wolf Pack, a man portable, high mobility, rapid deployment imaging platform that can be configured in the field to support a wide range of mission objectives. The system is built around a series of sophisticated camera sensors including high resolution thermal, near infrared night vision, and specialized optical devices.

Wolf Pack's SuperMesh™ and AlphaLink™ wireless transmission components further enhance system capabilities by enabling the creation of mobile ad hoc wireless networks with optional connectivity to larger back-haul infrastructure.

This wireless connectivity combined with Wolf Pack's comprehensive suite of imaging tools facilitates visual intelligence gathering in environments including tactical entry/hostage rescue, high-risk search, counter-IED/EOD, weapon and contraband interdiction, sniper/counter-sniper, covert surveillance, and urban SAR.
